Forecast for Friday 30 Sep 2022

Weather: Largely dry at first, but poor conditions developing with a band of occasionally heavy rain extending across the area during the early morning. This improves from mid-afternoon as rain clears east and showers follow from the west.

Chance of cloud-free hill tops above 800m: Becoming during the morning 10-20%, then during the afternoon 80%.

Low Cloud and visibility: Visibility becoming mainly moderate or poor as rain develops early morning, also very poor within the cloud, with bases becoming quite extensive down to 500m, later mainly good in the afternoon improvement.

Met Office Aberdeen Meteorologist's View

Very difficult conditions for much of the morning and early afternoon, with Storm force winds, hill fog and occasionally heavy rain.

Forecast for Saturday 01 Oct 2022

Weather: Strong, perhaps gale, west to southwest winds bringing occasional showers, these heavy at times with the small risk of thunder for the afternoon, also turning wintry across highest summits.

Maximum wind: West to southwest mean 25-30 mph with gusts reaching 45-50 mph at times across most exposed ridges and summits.

Chance of cloud-free hill tops above 800m: 90% plus for any particular time but lower chance of extended clear periods due to the showery nature of the flow.

Low Cloud and visibility: Good or very good visibilities, falling moderate or poor in showers, also very poor in cloud with bases occasionally falling 500m mainly in and around the showers.

Temperature: **Glens:** Plus 6 Celsius increasing 15 Celsius during the afternoon
At 800m: Plus 4 Celsius
Freezing level: 1400m
